Summary

Middle Backend C# Developer with 3+ years of experience building .NET-based backend systems and REST APIs, and collaborating with frontend developers to deliver integrated solutions. Strong background in clean architecture, distributed systems, relational databases, secure data handling, asynchronous messaging, and production deployment in load-balanced environments.

Experience

Back-End Developer

Aug 2024 - Present

Payunicard, Tbilisi, Georgia

- Developed .NET microservices (EF Core, Dapper, MediatR, RabbitMQ) and designed REST APIs utilizing MS SQL stored procedures and Oracle.
- Deployed and maintained services on IIS and Linux clusters behind HAProxy.
- Monitored, debugged, and troubleshooted production systems using Grafana and Loki; participated in code reviews.

Back-End Developer

Apr 2023 - Aug 2024

Revenue Service, Tbilisi

- Built ASP.NET Core (.NET 6+) backend services using layered architecture.
- Implemented REST APIs and RabbitMQ-based async communication.
- Worked with MS SQL and CI/CD pipelines in Azure DevOps.

Full-Stack Developer

Apr 2022 - Apr 2023

Bitoid Technologies, Georgia

- Developed full-stack web apps with React, TypeScript, PHP/Drupal, and MySQL on Linux.

Tax Controller

Mar 2015 - Mar 2023

Tax Monitoring Department, Revenue Service, Tbilisi

- Compliance monitoring, audits, and reporting.

Education

MBA, Banking and Finance

2015-2017

Ilia State University, Georgia

Bachelor's in Business, Management & Marketing

2010-2014

Ilia State University, Georgia

Technical Skills

Languages & Frameworks: C#, ASP.NET Core, .NET Core, .NET 6+, Razor, Blazor, Angular, React, TypeScript, JavaScript, PHP/Drupal

Databases: MS SQL Server, Oracle SQL, MySQL

Architecture & Principles: Microservice Architecture, REST APIs, RabbitMQ, OOP, SOLID Principles, Design Patterns, CQRS

Tools: Entity Framework, Dapper, MediatR, Git, Azure DevOps, IIS Server, Agile/Scrum, Grafana, Prometheus

Infrastructure DevOps: Cloud Platforms (Azure basics), Linux and Windows Servers (IIS), HAProxy Load Balancing, Grafana & Loki, Identity Server4, Git (Gitea, Azure DevOps), CI/CD Pipelines, Cloudflare (basic)

Front-End: HTML, CSS, Tailwind, Bootstrap, Twig

Other: Data Structures and Algorithms, CI/CD Pipelines, Debugging & Troubleshooting
